

1. Which of the following best describes Adaptive/Agile SDLC models?
 - A. Linear and fixed development models
 - B. Flexible and iterative development approaches
 - C. Hardware maintenance procedures
 - D. Database storage systems
2. What is the main goal of Agile SDLC models?
 - A. Eliminate testing
 - B. Deliver working software quickly and continuously
 - C. Increase documentation only
 - D. Reduce customer involvement
3. Which Agile principle focuses on customer collaboration?
 - A. Detailed contracts over communication
 - B. Customer collaboration over contract negotiation
 - C. Following a rigid plan
 - D. Ignoring user feedback
4. What is an iteration in Agile development?
 - A. A server installation
 - B. A short development cycle
 - C. A hardware upgrade
 - D. A database backup
5. Which SDLC model uses short development cycles called sprints?
 - A. Waterfall
 - B. Scrum
 - C. Spiral
 - D. V-Model
6. What is the usual duration of a Scrum sprint?
 - A. 1–4 weeks
 - B. 1 year
 - C. 6 months
 - D. 24 hours only
7. Who is responsible for managing the product backlog in Scrum?
 - A. Scrum Master

- B. Developer
- C. Product Owner
- D. Tester

8. What is the role of the Scrum Master?
 - A. To code the entire system alone
 - B. To facilitate the Scrum process
 - C. To replace the Product Owner
 - D. To create databases only
9. What is a product backlog?
 - A. List of completed tasks
 - B. Collection of project requirements and tasks
 - C. Final documentation
 - D. Hardware inventory
10. Which Scrum meeting is conducted daily?
 - A. Sprint Review
 - B. Sprint Planning
 - C. Daily Stand-up
 - D. Retrospective
11. What is discussed during a Daily Stand-up meeting?
 - A. Company salary
 - B. Progress, plans, and blockers
 - C. Marketing strategies
 - D. Legal contracts
12. Which Agile model focuses on visualizing workflow?
 - A. Scrum
 - B. Kanban
 - C. RAD
 - D. Crystal
13. What is commonly used in Kanban to track tasks?
 - A. Pie chart
 - B. Kanban board
 - C. Spreadsheet
 - D. ER diagram
14. Which Kanban principle limits the number of ongoing tasks?
 - A. Sprint Planning

- B. Work in Progress (WIP) limits
- C. Pair Programming
- D. Prototyping

15. What is the primary purpose of WIP limits?

- A. Increase multitasking
- B. Improve workflow efficiency
- C. Remove deadlines
- D. Increase coding errors

16. Which Agile model focuses on eliminating waste?

- A. Lean
- B. Scrum
- C. XP
- D. RAD

17. Which of the following is a principle of Lean SDLC?

- A. Deliver as late as possible
- B. Eliminate waste
- C. Avoid teamwork
- D. Reduce customer feedback

18. In Lean SDLC, what does “waste” refer to?

- A. Valuable features
- B. Unnecessary processes or activities
- C. Customer requests
- D. Software testing

19. Which Agile model emphasizes engineering practices and coding quality?

- A. XP
- B. Kanban
- C. Crystal
- D. FDD

20. What does XP stand for?

- A. Extended Process
- B. Extreme Programming
- C. Extra Planning
- D. External Programming

21. Which practice is commonly associated with XP?

- A. Pair Programming

- B. Waterfall planning
 - C. Long documentation
 - D. Sequential testing
22. What is Pair Programming?
- A. Two developers working together on one task
 - B. Two databases connected together
 - C. A testing tool
 - D. A project scheduling method
23. Which XP practice involves writing tests before coding?
- A. Regression Testing
 - B. Test-Driven Development
 - C. Black Box Testing
 - D. Alpha Testing
24. What is the main advantage of XP?
- A. Faster hardware installation
 - B. Improved software quality and flexibility
 - C. Less customer involvement
 - D. Reduced teamwork
25. Which Agile model focuses on rapid development and prototyping?
- A. Scrum
 - B. RAD
 - C. Lean
 - D. Crystal
26. What does RAD stand for?
- A. Rapid Application Development
 - B. Random Agile Design
 - C. Runtime Application Design
 - D. Rapid Agile Deployment
27. Which feature is most associated with RAD?
- A. Extensive planning before development
 - B. Fast prototyping and user feedback
 - C. Fixed requirements only
 - D. No testing process
28. What is a prototype in RAD?
- A. Final software release

- B. Early version of the system for testing and feedback
 - C. Hardware model
 - D. Database schema only
29. Which Agile model is people-centric and focuses on team interaction?
- A. Crystal
 - B. Kanban
 - C. Lean
 - D. Waterfall
30. Which factor determines the type of Crystal methodology used?
- A. Internet speed
 - B. Team size and project criticality
 - C. Number of computers
 - D. Office location
31. Which Crystal characteristic emphasizes communication?
- A. Frequent interaction among team members
 - B. Long documentation
 - C. Strict hierarchy
 - D. Delayed feedback
32. What does FDD stand for?
- A. Feature Driven Development
 - B. Functional Data Design
 - C. Fast Development Delivery
 - D. Framework Design Development
33. What is the main focus of FDD?
- A. Delivering features incrementally
 - B. Eliminating all testing
 - C. Database management only
 - D. Hardware optimization
34. Which activity is commonly performed first in FDD?
- A. Build a feature list
 - B. Deploy the system
 - C. Conduct maintenance
 - D. Install hardware
35. Which Agile model is best known for flexibility in changing requirements?
- A. Agile models

- B. Waterfall model
- C. V-Model
- D. Big Bang model

36. What is one major advantage of Agile SDLC models?
- A. Faster feedback and adaptation
 - B. Longer development time
 - C. Reduced communication
 - D. Fixed project scope only
37. Which of the following is a disadvantage of Agile methods?
- A. Difficulty managing changing requirements
 - B. Requires active customer involvement
 - C. No need for communication
 - D. Faster delivery is impossible
38. Which Agile model uses continuous delivery of small improvements?
- A. Kanban
 - B. Waterfall
 - C. Spiral
 - D. Prototype model
39. In Scrum, what happens during Sprint Review?
- A. Team members resign
 - B. Completed work is demonstrated to stakeholders
 - C. Coding standards are removed
 - D. Hardware is replaced
40. Which Scrum event focuses on improving team processes?
- A. Sprint Planning
 - B. Sprint Retrospective
 - C. Daily Stand-up
 - D. Product Demo
41. What is the purpose of Sprint Planning?
- A. To assign salaries
 - B. To define tasks for the upcoming sprint
 - C. To finalize deployment only
 - D. To replace the Scrum Master
42. Which Agile methodology is best suited for projects requiring rapid changes?
- A. Agile SDLC

- B. Waterfall SDLC
- C. Linear SDLC
- D. Sequential SDLC

43. Which Agile model is highly visual and easy to manage?

- A. Kanban
- B. RAD
- C. XP
- D. Crystal

44. Which methodology emphasizes “working software over comprehensive documentation”?

- A. Agile Manifesto
- B. Waterfall principle
- C. Spiral model
- D. V-Model

45. What is incremental delivery in Agile?

- A. Delivering software in small usable parts
- B. Delivering hardware components
- C. Delivering documentation only
- D. Delivering all features at once

46. Which Agile model encourages sustainable development pace?

- A. XP
- B. Waterfall
- C. V-Model
- D. Prototype

47. What is continuous integration in XP?

- A. Combining code changes regularly into a shared repository
- B. Delaying testing activities
- C. Installing hardware repeatedly
- D. Writing documentation manually

48. Which Agile model is most suitable for highly interactive customer feedback?

- A. RAD
- B. Waterfall
- C. Spiral
- D. Big Bang

49. Why are Agile methodologies popular in software development?
- A. They adapt quickly to changes and user needs
 - B. They avoid teamwork
 - C. They eliminate coding
 - D. They require no testing
50. What is the overall objective of Adaptive/Agile SDLC models?
- A. To create flexible, efficient, and customer-focused software development
 - B. To remove customer participation
 - C. To avoid software updates
 - D. To focus only on documentation
